

## Redmine - Feature #4781

### Make it possible to specify issue id on new issues

2010-02-09 10:23 - Andrea Salicetti

| <b>Description</b>  |          |                        |            |
| <p>It will be very useful if Redmine could make it possible to override the default behaviour of assigning an autogenerated issue id to the new issues, if a given id is specified.</p> <p>There could be a field "id" on the new issue form with that behaviour:</p> <ul style="list-style-type: none"><li>- If left blank, the id will be autogenerated (as it happens now).</li><li>- If specified, the given id is used for the creating issue (who insert that value has obviously the responsibility to choose one which is key in the issue table, otherwise a validation error will appear).</li></ul> <p>Enabling such a feature also for the email WS API would make the transition from other issue tracking systems a lot easier, because it would permit to keep the two system issues automatically in synch.</p> |          |                        |            |

#### History

**#1 - 2010-07-08 17:58 - Felix Schäfer**

- Status changed from New to Closed
- Resolution set to Wont fix

Won't fix, the internal ids get autogenerated, period. You could use a custom field to achieve some form of synchronicity to an external system though.
