**Description**

It would be nifty to have keyboard shortcut to create new issue from everywhere in a project.
Currently we cannot create a new issue not from summary and issue page, so we need two step to create new issuse (move issue page, and select issue type form drop-down list).

in Trac, you can press ctrl+7 to create new ticket, it's lightning fast.

And in Trac, there is always item "New Ticket" visible
and accessible in main menu.

**#2 - 2008-01-20 08:10 - Jean-Philippe Lang**

Done in r1081.
There is now a 'New issue' item in the project menu. The accesskey
is the same as Trac (7).
