

Redmine - Defect #4848

INSTALL doc: session key must be made before db structure

2010-02-15 12:18 - Henning Sprang

Status:	Closed	Start date:	2010-02-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	0.9.3	Affected version:	
Resolution:	Fixed		

Description

When trying to run step 4 in the INSTALL doc "rake db:migrate RAILS_ENV="production"

I get the mmessage "... A key is required to write a cookie containing the session data. Use config.action_controller.session = { :key => "_myapp_session", :secret => "some secret phrase" } in config/environment.rb"

Step 5 (running rake config/initializers/session_store.rb) solves this - but usually people run these steps from top to bottom, so the ordering should be changed :)

For the records: I'm working with redmine 0.9.2 here.

Associated revisions

Revision 3455 - 2010-02-19 19:52 - Jean-Philippe Lang

Fixes INSTALL and UPGRADING steps order (#4848).
