Description

During planning meetings we look at the roadmap and move issues to different versions.

It would be nice to be able to do that directly from the roadmap screen. A simple way would be an ajax dropdown menu and a fancier way would be to drag and drop issues from one version to another.

I intended to write an issue for requesting exactly the same feature. I use to work a lot with the "roadmap" page; Drag&drop functionnality for moving the issue from one version ot another should be great

Can it be done?
