

Redmine - Defect #4991

varchar(30) for login is too short when login=email (ldap typical usage)

2010-03-05 11:18 - Thomas NOEL

Resolution:	Duplicate		
Description			
Hi there,			
I use redmine with a LDAP authentication. The login is the email address (very classic). But I have some users with long email addresses, that exceed 30 chars. They cannot use my system...			
I see that in ./app/models/user.rb : validates_length_of :login, :maximum => 30			
I think it would be better to put the same lenght as mail : 60.			
Thanks.
