Description

After upgrading my bazaar version to the latest stable 2.1.0, listing of repository files got broke. Looks like the behavior of **bzr ls** has changed since 2.0.x series in the following way :

Behavior in 2.0.x

```
bzr ls -v --show-ids -r-1 '/home/shiny/testor/testorzor'
```

```
V      /home/shiny/testor/testorzor/laina      laina-20100306144813-cdqf0909scn3d6rk-1
```

Without ending trailing slash.

```
bzr ls -v --show-ids -r-1 '/home/shiny/testor/testorzor/'
```

```
V      /home/shiny/testor/testorzor//laina      laina-20100306144813-cdqf0909scn3d6rk-1
```

With ending trailing slash.

Behavior of 2.1.x :

```
bzr ls -v --show-ids -r-1 '/srv/bzr/hostingdodo/trunk'
```

```
V      /srv/bzr/hostingdodo/trunk/.bzrignore      bzrignore-20100306135421-300z3kdaig66wj9u-1

V      web/        web-20100306133332-iaYW586x91ffY61s-9
```

With trailing slash.

Since redmine is always trying to strip the path from the ls'd files (and always adds an ending trailing slash to the repo url, no matter how it is set in the db), the result with 2.1.0 is that no files are listed in the repository view.

Fixing this would be nice.

It seems that this fix is working on my 2.1.0 install. However i have not tested it with 2.0.x . Should i do so , or have you already done that ?

#2 - 2010-03-07 12:49 - Jean-Philippe Lang

Tests pass with bazaar 1.3.1, 2.0.4 and 2.1.0.
