

Redmine - Defect #5008

Gravatar breaks layout of "logged in" page

2010-03-08 13:39 - Henrik Ammer

Target version:	0.9.4	Affected version:	
Resolution:	Fixed		
Description			
<p>When you enable gravatar on the website it breaks the "logged in as USERNAME" page since there is no clearing after the h2 tag inside the div id="content".</p> <p>In the CSS you could add the following code:</p> <pre>#content h2:after{ content: "."; visibility: hidden; display: block; height: 0; clear: both; }</pre> <p>but it will only be supported in the later browsers (and will make the change on all pages, not just the logged in as one). Other places in the code you've added empty divs with the clear:both applied to its style attribute so might be needed here aswell.</p> <p>Now why you ask yourself? The following divs with the splitcontentleft and splitcontentright classes uses up 49% each of the space and since img.gravatar floats to the left it makes the splitcontentright appear below the splitcontentleft.</p> <p>I really hope you all understand me cuz I'm down with a flu and my brain ain't working at top speed. I'll see if I find the rhtml file and I might even add a patch for it. :)</p>

Revision 3562 - 2010-03-12 14:35 - Jean-Philippe Lang

Fixed: avatar display breaks user profile page layout (#5008).

History

#1 - 2010-03-08 21:19 - Jean-Philippe Lang

I'm not sure to know what the "logged in as USERNAME" page is.
Could you attach a screenshot?

#3 - 2010-03-08 21:24 - Jean-Philippe Lang

OK, I see (/users/1)

#4 - 2010-03-09 10:40 - Henrik Ammer

- File clear_both_user_show.diff added

I found the appropriate rhtml file (app/views/users/show.rhtml) however there is no div style="clear: both;" after .splitcontentright and I do see one in Firebug so therefor I thought it might be added in some javascript file but found nothing regarding it.

So, I've added a line with the div to user_show.rhtml (diff attached) but not totally sure that it's the way to add it. You be the judge.

Sorry, my bad for not pointing that out. I blame the snort! :)

The problem with clear:both; is that it will break if you add another higher floating div (eg. in the sidebar). I fixed it using another approach in [r3562](#).

This though makes other places gravatars are shown (like for instance issues) not align properly. Examples are "Assigned to" and the history of the issue as seen on the screenshot attached.

I don't really see what is wrong on your screenshot. I'm closing this ticket since the initial problem is solved and merged from 0.9.4 release. Open a new ticket if needed.
