**Description**

This seems not to work when I do pre and code style=diff. CodeRay however can highlight diffs.

As an example:

```

##### #4 - 2010-04-01 20:17 - Kornelius Kalnbach

It doesn't look like it's [supposed to look](#). :wrap => :span is not the right way to go, as it doesn't support the new line tokens that diff code needs.  
I recommend using .div instead of .html.
