

## Redmine - Feature #523

### Repository: View file at specific revision

2007-12-18 15:46 - Nils Adermann

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Mischa The Evil	<b>% Done:</b>	0%
<b>Category:</b>	Documentation	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>	Fixed		
<b>Description</b>			
You can see a list of committed files when looking at a certain revision of a file. They have links to a diff to the previous version but it would be useful if you could also download the file in that particular revision like you can download the latest revision of a file.			

### History

#### #1 - 2008-03-15 02:30 - Nils Adermann

I just noticed you just need to append &rev=(revision) to the URL to get it, can't be that difficult to add a simple link, that it takes so long?

#### #2 - 2009-10-05 00:45 - Mischa The Evil

- Category set to Documentation
- Status changed from New to Closed
- Assignee set to Mischa The Evil
- Resolution set to Fixed

I just came around this issue accidentally and found that this implemented in Redmine devel (trunk @ [r2903](#)) at least already.

This is a feature that should be documented much better, therefore I've assigned the issue to myself. Here's the current state in basic:

Let's say we have one file in repo (fileFoo) which contains two revisions (Rev1 and Rev2). You can download fileFoo at Rev1 by either:

- Repository -> fileFoo (in the JS repo-tree) -> Rev1 (in the revisions block) -> fileFoo (now at Rev1) -> Download
- Repository -> Rev2 (in the Latest revisions block) -> fileFoo (now at Rev2) -> History -> Rev1 (in the revisions block) -> fileFoo (now at Rev1) -> Download

It should also be possible to use the revision-selector, though that one seems currently broken in the trunk.
