Description	
<p>Hi,</p> <p>I attached a screenshot of the problem:</p> <ul style="list-style-type: none">- the text_fields are filled with cyrillic chars. The page encoding is set to Unicode (UTF-8). I'm using the native windows language bar.- take a look at the drop-down menus for Status (А А;А'â€šА'А°А'â€šА'Æ'А'А), Version (А'â€™А'АµА'â, -А'А' А'А'А':) <p>When I just point the mouse on the project drop-down menu, they disappear.</p> <p>Regards, Nikolay</p>

And... Are you intend to look at the first problem?
In fact this is a problem, maybe I did not wrote it correctly.
The cyrillic characters are not displayed correctly, it's like hex edit :)

Thanks, Nikolay

Fixed in rev 500.

#3 - 2007-05-02 13:20 - Nikolay Solakov

So do I :) I use only Firefox :)
But there is a lot of users in a company or even in the clients network to ignore it :(
The drop-down list are not so important to deal with them, but the cyrillic input seems to be :(
I think for a while how people use IE without even know of existing of Firefox... bad people :))

#4 - 2007-05-02 13:07 - Jean-Philippe Lang

IE6 has a bug: drop down lists (html select tags) are rendered over any div (without taking care of z-index attribut). So they are programmatically hidden (with javascript) when showing the menu.

IE7 seems to have this bug fixed. I could modify this behaviour to hide drop down lists only if IE < version 7.

To be honest, I hate loosing time to make things work with IE, when it runs fine with Firefox :-)
