

## Redmine - Feature #5338

### Descendants (subtasks) should be available via REST API

2010-04-16 14:15 - Matthew Schinckel

#### Associated revisions

---

##### Revision 4465 - 2010-12-04 14:02 - Jean-Philippe Lang

Adds subtasks to GET /issues/:id API (#5338).

#### History

---

##### #1 - 2010-04-16 14:16 - Matthew Schinckel

Similarly, in index.xml.builder, line 15:

```
xml.descendants do
  issue.descendants.each do |descendant|
    xml.descendant(:id => descendant.id)
  end
end unless issue.leaf?
```

##### #2 - 2010-05-01 16:10 - Jean-Philippe Lang

This would show a flat list of all descendants (not only children). How do you get parent/child relationships from that?

##### #3 - 2010-12-04 13:54 - Jean-Philippe Lang

- Status changed from New to Closed
- Target version set to 1.1.0
- Resolution set to Fixed

Added in r4465.

**#4 - 2010-12-26 07:04 - Alex Last**

I don't see this information in the response when I send request to REST API:

GET /issues/441.xml

(I'm using latest Trunk Redmine, just did "svn up")

is it not implemented for xml format?
