

Redmine - Feature #5372

Show "Time Logged" in an Issue's History

2010-04-22 17:03 - Alex Bevilacqua

Status: Closed	Start date: 2010-04-22
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	
Resolution: Duplicate	

Description

It would be really useful to have the option to display the amount of time logged, and the associated comment as part of an issue's history. I find that I tend to copy/paste the log message into a note and submit that each time I log time (so management has that record, especially when it is associated with progress towards a goal being changed).

This could be a toggle-able option in case people don't want it :P

- File Untitled-1.png added

Just in case my definition wasn't very clear, this is what I mean:

The screenshot shows a Redmine issue page with the following sections:

- Metadata:** Assigned to: Bevilacqua, Alex; Category: Templates; Target version: 0.0.1; % Done: 80%; Spent time: 2.50 hours; Estimated time: 2.00 hours.
- Description:** To create/update forms, we have to be able to add/remove/update the various fields.
- History:** Two entries by Bevilacqua, Alex. The first entry (20 hours ago) shows status changing from New to Assigned and % Done from 0 to 40. The second entry (1 hour ago) shows % Done changing from 40 to 60. Red arrows point from the 'Spent time' field in the metadata to these two history entries.
- Associated revisions:** Revision 17 (added 20 hours ago) and Revision 20 (added 1 hour ago).

I agree. I dont know why they did not made like this in original. History should show all changes for issue. If there is some time log for issue, it should be shown in history too!
