<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> First of all, great great work.  Now, a request that I think may be useful to all, it would be great if we could avoid creating a duplicate issue, especially when their creation is done via incoming email

Then please tell us, how you would detect a duplicate issue?  
See [RedmineReceivingEmails](#) on how to configure your mail setup to handle incoming mails only once.

#### #2 - 2013-03-17 17:10 - Ivan Cenov

This is a plugin that searches for duplicates -- interactively, while the user types the subject of new issue  
[https://github.com/abahgat/redmine\\_didyemean](https://github.com/abahgat/redmine_didyemean)

#### #3 - 2013-03-17 18:24 - Daniel Felix

Yes the plugin could solve this but Redmine includes a dynamic lookup (issue relation).  
Maybe this could be easily enhanced to provide this functionality from scratch, which could be activated/deactivated. This would be great.

This would maybe prevent some of the issues on Redmine.org too.
