

Redmine - Defect #5538

Default 'my page' widgets lost after adding first widget.

2010-05-17 14:24 - Dominic Clifton

Status:	Closed	Start date:	2010-05-17
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	My page	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.1
Resolution:	Wont fix		

Description

Steps to repeat:

1. login with a new user account
2. click 'my page'
3. click 'personalize'
4. choose a widget, click 'add'
5. observe new widget it added to the page, along side existing widgets.
6. click 'my page' to reload the page.
7. observe that only the just-added widget is displayed and the previous default widgets are no longer present.

Expected behaviour

- Default widgets are displayed on subsequent page views along side newly added widget.

Notes

This occurs on www.redmine.org as of 17/May/2010 and on my local instance.

History

#1 - 2010-05-17 15:44 - Holger Just

- File `keep_default_widgets.diff` added

I can confirm the issue on a local trunk installation. It does only occur for new users which have not yet an entry in the `user_preferences` table. Following [r3194](#), the my page layout is initialized empty instead with `DEFAULT_LAYOUT`. The attached patch fixes this and provides some tests.

#2 - 2013-01-14 15:24 - Daniel Felix

- Category set to My page
- Status changed from New to Confirmed
- Affected version (unused) set to 2.2.1
- Affected version set to 2.2.1

I can confirm this misbehaviour.

This is still included in Redmine 2.2.1.

The patch looks good in my opinion. It should correct this bug.

#3 - 2013-01-14 15:53 - Etienne Massip

- Target version set to Candidate for next minor release

There's even a test, woohoo.

#4 - 2018-02-25 17:12 - Marius BĂLTEANU

- Status changed from Confirmed to Closed
- Resolution set to Wont fix

I'm closing this issue because "My page" was refactorized in [3.4.0](#) and "Personalize" mode doesn't exists anymore (the widgets are edited inline). Please reopen it if I'm wrong.

#5 - 2018-02-25 17:12 - Marius BĂLTEANU

- *Target version deleted (Candidate for next minor release)*
