Description

Hello,
As of r507 - I couldn't see the filter because I had custom queries applied, when I deleted them, they continue to appear when I click Issues. Trying to erase them show me the 404. Now I have no custom queries exept the last deleted and it appers to be permanent until destroying the session of the browser :)

Thanks,
Nikolay

Oh you're right. There's the "View all issues" on project
overview that resets the filter. Not so easy to find.

So I added a "clear" link when displaying a saved query
(rev 513).

#2 - 2007-05-05 14:08 - Nikolay Solakov

It's working good now :)

Thank you :)

Nikolay
