

Redmine - Feature #5664

Copying documents too when copying a project

Description			
Currently, when you copy a project there is no possibility to copy the documents it contains (either all or a selection of them). Concretely we are interested in creating a project template that includes not only wiki pages and issues but also certain basic documents such as for example: <ul style="list-style-type: none">• An Openproj template we use for planning before the projects formally start• An excel sheet we use for projects that need additional monitoring• Document templates for lifecycle specific internal deliverables

The patch will be kept up to date in this feature branch:
https://github.com/esemplare/redmine/tree/feature_5664

This patch is against redmine/trunk.

#7 - 2016-07-04 03:58 - Hugues C.

Isn't this a bug ? The expected behavior for the average user : copying a project means copying everything, not everything except documents.

#8 - 2017-03-24 18:58 - Kamil .

Bug which is already 7 years old?!

#9 - 2017-08-04 04:28 - Go MAEDA

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

Closing this issue because an updated patch for the current trunk has been submitted as [#26621](#).
