

Redmine - Patch #5669

Subversion mirror creation.

2010-06-10 23:46 - Bryce Nordgren

Status:	New	Start date:	2010-06-10
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:			
Description			
<p>This patch modifies reposman.rb such that it can be run on a machine which mirrors the Subversion repositories created by Redmine. An additional SCM module is defined (Subversion_mirror) which creates any repositories which do not already exist on the mirror. These repositories have the pre-revprop-change hook installed, and svnsync init is called.</p> <p>This patch is against the 0.9-stable branch at r3768. The patched file is also attached.</p>			

History

#1 - 2010-06-10 23:47 - Bryce Nordgren

- % Done changed from 50 to 100

I'm changing this to 100% done because I don't expect to be making any modifications.

#2 - 2011-01-18 06:27 - Toshi MARUYAMA

- Category set to SCM

#3 - 2011-03-24 07:53 - Toshi MARUYAMA

- Category changed from SCM to SCM extra
