```

History

#1 - 2007-06-12 18:32 - Jean-Philippe Lang

Now (rev 560), a clean message is displayed when trying to create an issue if no default status is defined.

Default status can be defined in Admin -> Issue tracking -> Issues statuses.

#2 - 2007-05-30 01:29 - Nicolas Modrzyk

I can confirm both.

It happens when no default status has been defined in the database.

My setup was done through capistrano, I'm not sure if it matters, but it was working just fine when not using it and doing a local deploy on my machine.

#3 - 2007-05-07 18:03 - Jean-Philippe Lang

It seems that there is no default status defined in your configuration.

Did you load the default configuration data ?
(see INSTALL doc point 5).
