Description

It would be nice to have custom queries available via Rest Api.

Revision 6186 - 2011-07-06 18:57 - Jean-Philippe Lang

Makes custom queries available through the REST API (#5737).

History

#1 - 2010-07-27 23:01 - Alex Last

+1. my application also requires retrieval of available "custom queries" from Redmine.

#2 - 2010-07-30 12:21 - Gao Yong Pan

+1 need this one.

#3 - 2010-08-26 00:46 - Eric Davis

- *Priority changed from High to Normal*

What are you asking for here, to be able to **run** a custom query from the API? (giving you a list of issues) Or to be able to **edit/create** custom queries from the API?

#4 - 2010-08-26 03:30 - Alex Last

- *File query_id.PNG added*

what I need (and my guess is that's what the submitter meant too) is to get list of user's saved queries.
this is Redmine config page in my application:
  query_id.PNG
I don't want to force users to go to Redmine web interface and look for "query ID". it would be much better to have "load queries" button, which would get list of queries from Redmine server and show them in combobox.

My request is about being able to retrieve the list of saved queries and to run a selected one.

Any chance to have this implemented in Redmine 1.1.0?

#8 - 2010-12-25 01:43 - Alex Last

- Assignee set to Jean-Philippe Lang

Jean-Philippe, I hope you don't consider this too impolite if I take the courage to reassign this task to you. This looks like an easy thing to implement and it would help me a lot.

In few words: I just need to load a list of saved queries from Redmine server (even "query name" and "id" is enough at this moment).
I don't see another way for my users to see which "saved queries" are available in their Redmine.

#9 - 2011-02-11 07:07 - RedminePro Yang

+1 for this feature

#10 - 2011-07-06 18:58 - Jean-Philippe Lang

- Subject changed from Custom Query available in Rest Api to Custom Queries available through the REST Api

- Status changed from New to Closed

- Target version set to 1.3.0

- Resolution set to Fixed

Committed in r6186, try GET /queries.xml (see Rest_Queries).

#11 - 2011-07-07 06:22 - Alex Last

I added support to Redmine Java API: https://code.google.com/p/redmine-java-api/issues/detail?id=55

#12 - 2011-07-12 22:57 - Alex Last

the API works fine for me. thanks!
