Redmine - Defect #5800

Problem with Redmine Links in a pre

2010-07-01 16:23 - Patrick Sernetz

Target version:				
Resolution:	Invalid		**Affected version:**	

Description

I´ve just installed latest trunk version 3824 today. I´ve got a pretty good filled wiki with lots of information about sql scripting. I placed these SQL always inside a pre and link inside the pre different parts of the sql to wiki pages.

```
SELECT * FROM [[info_cube]]
```

In our last version 0.9.4 of redmine these queries where rendered as pre with the link to the wiki page info_cube inside. This way I could really fast document my SQL work. In the current version the behavior changed and my wikilink get´s displayed as normal text and not like a link ([[info_cube]] without the space).

Is there any chance that this can be changed or configured somewhere?
