Description <p>I was just looking for a way to privately reply to a message I received in a ticket and it struck me that there's no PM system. I wanted to reply directly to the member to avoid cluttering up the ticket with personal correspondence. Not only can I not find a PM system but I also can't see any contact details when I click his user name. These are 2 features that are a standard on most community management sites and I think would be extremely useful for Redmine to incorporate.</p> <p>I realise Redmine is still very much under development but I just thought I'd put the idea out there as I couldn't find any similar suggestions when searching.</p> <p>In summary, I am suggested 2 features:</p> <ul style="list-style-type: none">• A simple private messaging system and user inboxes• A more elaborate "profile" page for each user with custom fields			
Related issues: <p>Is duplicate of Redmine - Feature #2336: Private messages</p>

In summary, I am suggested 2 features:

- A simple private messaging system and user inboxes

This duplicates issue [#2336](#). Please look at that issue (and it's duplicates) for more info.

- A more elaborate "profile" page for each user with custom fields

Please search if another issue for this exists already or open a new one if you're sure one does not yet exist... ;)
