

Redmine - Feature #6077

Only add public project data to activity feed

2010-08-09 00:06 - David Raison

Status:	Closed	Start date:	2010-08-08
Priority:	Normal	Due date:	
Assignee:	Mischa The Evil	% Done:	0%
Category:	Feeds	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description			
<p>There should be an option to only have the activity of public projects in the activity feed, i.e. at http://www.redmine.org/activity.atom?key=d6a6088ab1c624fba1d81e2b39d30a042941b71c</p> <p>Having made the changes to <code>app/controllers/projects_controller.rb</code> as detailed in Defect #5317, information on all projects, even if not public, is available through the feed.</p> <p>If possible, activity on non-public projects should only be made available to users with sufficient authorization, while the "public" feed should not contain that information.</p>

Well, the key you provide authenticates you, if you put your key in there, you will get the activity for all the projects you are authorized to see. If I log off and get the atom feed without the key, I only see public projects, or to be more correct: I see everything that doesn't need authentication.

Long story short: can't reproduce, can you please give steps to reproduce? Do you have any plugins installed?

Oh, so that is what the key is for... o.O

Oops, typical pebkac error, sorry :D I have a habit of filing such stupid tickets.

- Status changed from Resolved to Closed

- Resolution set to Invalid

Yes, all "machine-interfaces" (i.e. non-html) are accessible with keys (the Feeds key for the ATOM feeds, the API key for REST API) instead of login+password as the authentication in redmine is not http-simple but through a specialized page that creates a session.

Anyway, no harm done and thanks for reporting back :-)

(consequently, if the key you have pasted with the link is legit, you should go to "My page" and "reset" your RSS access key (right hand sidebar).)

This should be documented in the Redmine [\[\[Guide\]\]](#) more obvious.
