

Redmine - Defect #6078

Email notification not working at all

2010-08-09 00:45 - Stephan Senn

Status:	Closed	Start date:	2010-08-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.3
Resolution:			
Description			
<p>The behavior is very strange. The test email is working correctly. But as soon as a user wants to add or edit an issue, she/he does not get an email. I've figured out the problem:</p> <p>The variable <code>@recipients</code> in "mailer.rb" does somehow not take over the array which is passed by <code>issues.recipients</code>. The funny thing is if I define the variable <code>@recipients</code> just in place there let's say...</p> <pre>@recipients = "test@test.com" or @recipients = ["test1@test.com", "test2@test.com"]</pre> <p>... then the email/s is/are sent. And it is getting more weird: If I dump the state of the variable <code>@recipients</code> after assignment, the array is correctly assigned. So something must be fishy either with the reference of <code>_issues.recipients_</code> or what I think with the <code>@recipients</code> instance class variable. Maybe the call for sending the email does not belong to the created instance class?!</p> <p>At the moment I have no further idea how to solve this problem...</p>

History

#1 - 2010-08-09 03:49 - Nick Peelman

The user doesn't, by chance, have their preference set to not receive notifications for updates they make themselves?

#2 - 2010-08-26 00:33 - Eric Davis

- Assignee deleted (Martin Herr)
- Priority changed from Urgent to Normal

#3 - 2014-01-05 06:48 - Toshi MARUYAMA

- Status changed from New to Closed

This issue is too old.
Mail impletation changed in Rails3 porting.
