

Redmine - Defect #6163

Bad CSS class for calendar project menu_item

2010-08-17 21:21 - Jean-Baptiste Barth

Status:	Closed	Start date:	2010-08-17
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	UI	Estimated time:	0.00 hour
Target version:	1.0.1	Affected version:	
Resolution:	Fixed		

Description

See screenshot attached.

It's due to a CSS class name collision with calendar.css, which defines ".calendar". I wonder if it should be fixed in calendar.css or in classes definitions for our menu items.

What theme? I didn't see that when I tested.

#2 - 2010-08-17 21:38 - Jean-Baptiste Barth

Default, but no matter the theme. You get this when calendar.css is included, which happens whenever calendar popups are used on the page I think. "New issue" tab for instance.

- File calendar_css_conflict.diff added

I noticed this yesterday too and attempted a fix: http://github.com/asoltys/redmine/tree/calendar_css_conflict

#4 - 2010-08-18 23:14 - Jean-Baptiste Barth

Looks ok to me, thanks. As Eric assigned it to himself, I let him check if he's ok and commit this patch.

- Status changed from New to Resolved

- % Done changed from 0 to 100

- Resolution set to Fixed

Applied your patch Adam, thanks for the fix ([r3950](#)).

To make it easier on me, could you format your patches to the [Commit standards](#). (It's new but it will help save me time when applying patches in git).

#6 - 2010-08-19 06:35 - Eric Davis
- Status changed from Resolved to Closed

Merged to 1.0-stable for release in 1.0.1.
