

## Redmine - Defect #6182

### Localized decimal numbers

2010-08-20 11:04 - Petr Pospisil

<b>Resolution:</b> Duplicate	

**Description**

Hi, how do I adjust the settings so I can enter localized decimal numbers to custom fields? I cannot find something to change decimal point to decimal comma. The "number.human.format.\*" in the locals has effect only to show form (included in helpers - number\_to\_currency etc.). If you are adding a new numbers the english format is forced.

I have founded <http://github.com/clemens/delocalize> or <http://gem-session.com/2010/03/how-to-use-the-comma-as-decimal-separator-in-rails-activerecord-columns-and-text-fields>, but pulling a cat's tail seems to be better fun :-).

Thanks for a reply.  
Regards  
Petr

**#10 - 2016-08-24 01:32 - Herman Suszkewciz**

I did it.

Workaround with Custom JS Plugin and example JS <http://www.redmine.org/boards/4/topics/44418>

**#11 - 2024-01-01 09:07 - Go MAEDA**

- *Related to Feature #22024: Support localized decimal separators for float values added*

**#12 - 2024-01-04 08:12 - Go MAEDA**

- *Status changed from New to Closed*

- *Priority changed from High to Normal*

- *Target version deleted (Candidate for next major release)*

- *Resolution set to Duplicate*

The feature was added by [#22024](#) for the upcoming Redmine 6.0.0.
