

Redmine - Feature #6204

Make the "New issue" menu item optional

2010-08-25 02:55 - Alexander A

Status:	Closed	Start date:	2010-08-25
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:	3.3.0		
Resolution:	Fixed		
Description			
I suggest to delete a bookmark "New issue" from the project interface. It is more logical, if the new problem can be added directly from the task list. The page "New issue" will appear on a clique on an icon in the task list.

Same request for a client: people don't understand why "new issue" position differs from all other elements. If I remember correctly, Shane&Peter design also put it elsewhere on the page, as a big green "New Issue" button.

Maybe we could simply add the links on issue page, and let theme designer decide where this item should go by hiding it where they want. What do you think ?

#3 - 2010-08-25 07:40 - Jean-Baptiste Barth

- Category set to UI

#4 - 2010-08-25 15:36 - Alexander A

#5 - 2010-08-25 15:39 - Alexander A

I think what is it the menu for the project:
Redmine_-_Issues_-_Redmine_1282743461818.png
It is here again illogical to place a new issue.

And someone will want the New document or the New file list were always accessible to addition and then the global menu of the project will turn to not clear. And it will break structure and logic of elements of the menu.

The decision can be such:

1. The button to Add a issue to make as here: Feature [#6204](#)
2. To make adjusted area "the Adjusted menu" where the user can add menu points at own discretion: the New document, the New file, the New issue and others.

Remove "New issue" menu item

+1

#13 - 2011-07-30 23:56 - Seth Sandler

What's the status of this? Is there a way to remove the 'new issues' tab and place a button the 'issues' page?

#14 - 2011-07-31 00:50 - Seth Sandler

- File *index.rhtml* added

This is a hack, but for people without other options you can try this. I'm uploading the *index.rhtml* file that should be placed in `app\views\issues\` folder. This adds the 'new issue' button in the proper place (like other documents page).

Then to hide the 'new issues' button, I just put this in my theme's *application.css*

```
a.new-issue {
  visibility: hidden;
  width: 0px;
  margin: 0px;
  position: absolute;
}
```

It's not ideal, but it works.

I imagine that some people would argue about one more click. They would have to click on Issues and than creating actually a new issue.

Nice thing would be to have the possibility to create a New Issue from "View all issues" actually. If this would be possible under Issues tab it would be also great to have it on the all issues view. In this case it would be globally and similar to moving issue to different project where you can select the

project for the issue.

#17 - 2013-06-02 15:07 - Alexander A

I think that reducing of the clicks needed another way, without disturbing logic.

For example - to add the ability to sort the tabs modules. Then you can sort the first tab the "issues" and a single click will be less.

And the fact that the tab "New issue" to remove in the project interface, proves this screenshot:

[4e2e3c2da0a518329de88dcd9603394e.png](#)

We see that the "New issue" can not be disabled, so the tab is illogical.

#18 - 2013-06-02 15:49 - Ivan Cenov

I think it is appropriate to add new item in the context menu of issues' list: "New issue".

#19 - 2013-06-02 17:34 - Alexander A

I doubt it - the context menu is the context of the issue. If the issues list is empty, and the menu is not.

- Resolution set to Fixed

Menu item removed in [r15344](#) and replaced with a link on the issue list.

Miko Kinski wrote:

The "New issue" link is added to the global issue list in [r15345](#).

#24 - 2016-05-08 17:27 - Go MAEDA

- Status changed from Closed to Reopened

Since Jean-Philippe Lang decided not to implement global add button ([#15880](#)) in Redmine 3.3.0 ([#15880#note-33](#)), I think we have to revert the changes in [r15344](#) to recover "New issue" tab. (No need to revert [r15345](#)).

In my opinion, "New issue" tab should not be removed without implementing [#15880](#).

#25 - 2016-05-09 19:20 - Jean-Philippe Lang

- Subject changed from Remove "New issue" menu item to Make the "New issue" menu item optional

- Status changed from Reopened to Closed

In my opinion, "New issue" tab should not be removed without implementing [#15880](#).

The removal of the menu item was initially requested without the need of [#15880](#).
Many would miss it anyway so I've restored it but it's now optional (Settings -> Display -> Display the "New issue" tab)

#26 - 2016-05-10 01:54 - Go MAEDA

Great! Thanks a lot.

I see why the "New Issue" tab was removed and the "+" added, but I am unhappy with the choice made regarding configuration of those. I would like to have a third option, "Show both", so that Users will see the "Add New"+ AND the "New Issue" (which is quick and can be found with CTRL-F, which is always an indication for a good solution). Should I open a new issue for that?

Yes, could you open a new issue?

This issue cannot be reopened because the feature has already been delivered in Redmine 3.3.0.
