| Target version: | | | |
| Resolution: | | | |
| Description | | | |
| Provide autocomplete feature for custom fields of type "list" with large list of values. | | | |
| It could work just like the members tab on projects for multi select lists (issue #1189) or like the google search box for regular lists. | | | |

I'd like to see this too.

#2 - 2014-09-02 11:20 - Anish Mangal

I'd love this as well. I have long lists of entries that need to be entered, and having autocomplete rather than searching 500 entries would be very beneficial

#3 - 2017-03-16 16:19 - William Peixoto

+1, this is very useful

#4 - 2017-10-13 14:18 - Peter Volkov

I haven't tried yet, but this looks like what we need:
