

Redmine - Defect #6415

Secondary project filter doesn't work as expected

2010-09-16 16:31 - David Marín Carreño

Status:	Closed	Start date:	2010-09-16
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.0.1
Resolution:	Invalid		
Description			
In issue list, I am trying to establish a new filter for only showing the issues that belong to a given secondary project (subproject). After applying the filter, I get all the issues in the secondary project, but also I get the issues in the main (parent) project.			

History

#1 - 2010-09-16 16:44 - David Marín Carreño

- Status changed from *New* to *Resolved*

Sorry: I have just realized that what I am asking is available using the subproject issue list, instead of the parent project one.

#2 - 2010-09-16 18:09 - Felix Schäfer

- Status changed from *Resolved* to *Closed*

- Resolution set to *Invalid*
