

Redmine - Defect #6476

Subproject's issues are not shown in the subproject's gantt

2010-09-23 14:34 - Yuki Kita

Status:	Closed	Start date:	2010-09-23
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gantt	Estimated time:	0.00 hour
Target version:	1.2.0	Affected version:	
Resolution:	Fixed		
<b>Description</b> When the version of a subproject's issue is shared with projects, the subproject' issue is not shown in the subproject's gantt. (Shown only in the parent project's gantt)  The behavior changed after the gantt rewrite.

I've just installed the development release to see how the new gantt feature works and experienced the same issue.

+ when viewing the gantt chart of the parent project you get:

```
master project
| - shared version (created on master project)
|   |-- issue created in master project (target version assigned to shared version)
|   |-- issue created in subproject (target version assigned to shared version)
|
| subproject

instead of

master project
| - shared version (created on master project)
|   |-- issue created in master project (target version assigned to shared version)
|
| subproject
|   | - shared version (created on master project)
|     |-- issue created in subproject (target version assigned to shared version)
```

Could someone try this patch at [#7456](#) ?

#4 - 2011-02-11 06:15 - Yuki Kita

Etienne

I tested the [gantt\\_filters.patch](#) at [#7456](#) , and confirmed this issue was fixed.  
I appreciate your work.  
Thank you.
