

Redmine - Feature #6618

Global Gantt and Calendar view (for all projects)

2010-10-10 22:12 - Iñaki Baz Castillo

Status:	Closed	Start date:	2010-10-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Calendar	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
<b>Description</b> <p>I manage various projects in a Redmine instance. In order to look for schedule of tasks, bugs and milestones I must go into every projects in order to display the Gantt and Calendar associated to such project, which is not very comfortable.</p> <p>So I suggest global Gantt and Calendar views displaying data across all the existing projects (in which I have read access). There could be two new items (Gantt and Calendar) in the main menu.</p> <p>"My page" already provides something similar (just Calendar) but it only shows current week, and there is no way to inspect next days/weeks which makes it a bit unuseful.</p>			

History

- Status changed from New to Closed
- Resolution set to Invalid

You already have this even if it's a bit difficult to find : go to "Projects" on top menu, then "View all issues" item, then you'll find "Calendar" and "Gantt" links in the sidebar. They lead to the cross-project views you want I think. Reopen if this is not what you search.

Sorry, you are right, I couldn't find these options.

As a separate suggestion (probably I should open a new feature request) it would be useful that the filter in these global Calendar and Gantt views allows filtering the project(s).

Thanks a lot.

I think it's possible if you have Redmine >= 1.0.1 (see [#5084](#) for more informations)

#4 - 2010-10-10 22:44 - Iñaki Baz Castillo

Sorry, I checked it in a Redmine < 1.0 (in 1.0.1 it is implemented). Thanks a lot.
