

Redmine - Defect #6627

missing "add new file" in Files section

2010-10-11 16:19 - Mike Lu

Status: Closed	Start date: 2010-10-11
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Fixed	
Description after upgraded to 1.0.2, i found that i could no longer upload files in Files section since the link to upload new file is missing; however, uploading via attachment is still working.	
Related issues: Is duplicate of Redmine - Defect #6513: "Move" and "Copy" are not displayed w... Closed 2010-09-28

Revision 4268 - 2010-10-22 16:45 - Jean-Philippe Lang

Fixed: "Add file" link broken by recent refactoring (#6627).

History

#1 - 2010-10-11 18:33 - Holger Just

Make sure the user you are testing with has the "Manage Files" permission in the respective project.

Apart from that, I can not reproduce this issue.

#2 - 2010-10-12 05:25 - Mike Lu

yes, user permission i'm testing could "Manage Files". another evidence is that "Delete" button has shown up. i had modified the source so that files could be uploaded to configured folder, i'll try to remove the modification to see if the problem is caused by that.

#3 - 2010-10-12 05:39 - Mischa The Evil

I'm not able to reproduce this behaviour on a clean checkout of 1.0-stable.

The issue is indeed most likely caused by some core-modifications...

#4 - 2010-10-12 06:40 - Xaggy Wulf

My upgrade reset role permissions. Re-checking "manage files" etc. fixed the problem. Just pointing this out here in case you weren't aware of that.

#5 - 2010-10-12 08:29 - Holger Just

- Status changed from New to Closed

- Resolution set to Cant reproduce

As this was resolved by removing core changes, I'm closing this issue.

#6 - 2010-10-12 18:36 - Mike Lu

- Status changed from Closed to Reopened

sorry that i didn't clearly list my environment, the version of my redmine should be trunk version on windows with apache2 and is served in a sub-URI "/redmine". and the user i tested with has checked to have "manage files" permission.

i have found the cause that as long as redmine is started in a sub-URI, the link of "New file" would be missing, with my modified version or with a clean checkout of trunk ([r4249](#))

i have tried both thin and mongrel server that all showed up the same result:

1. added Redmine::Utils::relative_url_root = "/redmine" to the bottom of environment.rb, after the last end statement
2. started the server with command thin start -e production or ruby script/server start -e production

3. link was missing in Files section
4. applied the test on clean checkout and the link was also missing

but if i

1. reverted the modification in environment.rb (no `Redmine::Utils::relative_url_root = "/redmine"` at the end)
2. start the server with command `thin start -e production` or `ruby script/server start -e production`
3. link showed up
4. applied the test on clean checkout and the link also showed up

so i don't think to problem is caused by my modification or my environment

#7 - 2010-10-12 23:10 - Felix Schäfer

- *Affected version (unused) changed from 1.0.2 to devel*
- *Affected version deleted (1.0.2)*

Ah, I think that's one of Eric's refactors gone south. I think I had a solution up for that, though it seems it hasn't been added to trunk yet. I'll try to find it and poke him long enough that he commits it.

#8 - 2010-10-13 02:34 - Felix Schäfer

See if [#6513](#) solves this for you, I think it's the same issue.

#9 - 2010-10-16 03:05 - Mike Lu

like what Eric has done in [r4258](#), with modification in [r4257](#), revision [r3616](#) should also be partially reverted to solve this problem, and some other revisions, too, to solve [#6650](#)

#10 - 2010-10-16 03:36 - Mike Lu

problem solved after backout the whole [r3616](#)

#11 - 2010-10-22 16:39 - Jean-Philippe Lang

- *Status changed from Reopened to Closed*
- *Resolution changed from Cant reproduce to Fixed*

Fixed in [r4268](#).
