

Redmine - Feature #6631

Provide security (e.g. display only) for custom fields

2010-10-12 05:29 - Xagyg Wulf

Status: Closed	Start date: 2010-10-12

Target version:	
Resolution: Fixed	
Description It would be nice to be able to assign permissions (update, view) for roles on custom fields. The most basic requirement for my purposes is that I want to be able to specify some custom fields as display only.

It will be useful for me too. I think this issue could be linked to [#7412](#) (to implement not permissions for roles but "internal" custom fields).

#2 - 2011-06-08 17:01 - Oleg Aksenov

"internal" custom fields

I means not [#4298](#) (internal for plugins) but internal for "Administrators" role etc.

This is already available through /workflows/permissions.

#6 - 2016-04-27 15:11 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Fixed

Indeed. This is implemented by [#5037](#).
