<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>It would be nice if there would be a couple of auto generated reports. For example a user that is connected to a category of issues should have a report displaying all issues in this category.</p> <p>Another thing could be that special statuses could be marked for a role as important for them. Every user with this role would then get a special report showing all issues with this status.</p>
