Description

Could there be a new Custom Field Type be added: File?

For each Issue in our system, we have a few specific files that need to be completed (ie-project specification, testing plan, deployment package, etc.). It would be really helpful if we could create a custom field as a file field so in the issues list we could see if a specific required file exists and view it from the issues list.

Attached is an example.

+1
I like the idea of extending redmine with files/attachments/images.. ecc ecc

Hope to see this soon

Has anyone solved this issue with any workaround or patch?
We have to force users to upload files in issues and check if file uploaded...

This feature would be very useful. Especially if it would let the user set some limitations on file size, type, etc. for each custom field of type "File".
