Redmine - Defect #6870

Atom Feed does not take into account the https settings

2010-11-12 01:34 - Anonymous

Status: Closed Start date: 2010-11-12

Priority: Normal Due date:

Assignee: % Done: 0%

Category: Feeds Estimated time: 0.00 hour

Target version:

Resolution: Invalid Affected version:

Description

Hi,

HTTPS protocol is selected in Administration / Settings area but ATOM generated feeds (Activity, Issues) contain HTTP URL instead of the HTTPS one.

See below an example:

Cheers,

Alexandre

History

- Status changed from New to Closed
- Resolution set to Invalid

The setting is only for links sent per mail, the atom links are generated with the same protocol you are accessing redmine on.

I get access through a reverse proxy.

Client --- HTTPS ---> Reverse Proxy --- HTTP ---> Redmine (Apache + Mod Passenger)

How do I make Redmine aware that the original request is initiated over SSL?
