Redmine - Defect #6870

Atom Feed does not take into account the https settings

2010-11-12 01:34 - Anonymous

Status:	Closed		**Start date:**	2010-11-12
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Feeds		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

Hi,

HTTPS protocol is selected in Administration / Settings area but ATOM generated feeds (Activity, Issues) contain HTTP URL instead of the HTTPS one.

See below an example:

```
  ...
  <generator uri="http://www.redmine.org/">
Redmine  </generator>
  <entry>
    <title>Revision 1519: imports Maven POM definition for Web Application projects. </title>
    <link href="http://domain.tld/projects/ts/repository/revisions/1519" rel="alternate"/>
    <id>http://domain.tld/projects/ts/repository/revisions/1519</id>
  ...
```

Cheers,
Alexandre

- Status changed from New to Closed

- Resolution set to Invalid

The setting is only for links sent per mail, the atom links are generated with the same protocol you are accessing redmine on.

#2 - 2010-11-16 05:25 - Anonymous

I get access through a reverse proxy.

Client --- HTTPS ---> Reverse Proxy --- HTTP ---> Redmine (Apache + Mod Passenger)

How do I make Redmine aware that the original request is initiated over SSL?
