Description

I have reported #1189 over two years ago. To this day, redmine keeps bombarding me with "+1" emails, without allowing me to opt out from the notifications. Really, I'm no longer interested in this bug - I no longer work for the company I reported it for.

There really needs to be a "stop notifying the reporter about this bug" switch.

We could simply add author to watchers list at issue creation so that author can unwatch anytime ?

It would be cool to be able to change author of a ticket (like in JIRA).

There is already an issue for this (#1739).

#1739 is about changing the owner (like Anton suggested), I just want to no longer receive fraking notifications (there is noone to assign ownership to). I would delete the damn ticket if I could.

Well, I was answering to Anton, sorry for the misunderstanding.

I think the proposed behavior is straightforward.
