Redmine - Feature #7092

Disable access to Redmine

2010-12-10 18:20 - Ivan Cenov

Description

It would be useful if Redmine's administrator has an option to disable the access of the regular users. This way the administrator will be sure that no one will do anything in Redmine when he is administering it.

History

I would recommend you to solve that on the webserver instead so that you don't need a running stack with a working redmine.

#2 - 2010-12-15 23:28 - Jean-Baptiste Barth

Same advice here, even if I don't exactly see which admin action would be disrupted by users action.. If you really want to do this it would be easy to implement in a plugin.

#3 - 2010-12-16 07:29 - Ivan Cenov

I agree with you. The administrator may stop mongrel and/or apache and do what it wants disrupted.

(I took the idea from drupal. It have an option to put the site in maintenance mode.)

Please close this issue.

Yes, this does what I need.
Please close the issue if no one else is interested in it.

hey guys, I made a "real" plugin out of the code hunk from @edavis10
check it out: http://www.redmine.org/plugins/redmine_maintenance_mode
