##### Revision 4579 - 2010-12-29 20:37 - Jean-Philippe Lang

Takes more parameters into account to determine activity freshness (#7188).

#### History

##### #1 - 2010-12-28 12:34 - Felix Schäfer

Yes and no: the activity page makes heavy use of caching, and what you are seeing is the cached version of the page, which happens to be from the time you had english activated. Try either emptying your browser cache, or do anything that adds to the activity page, that should refresh the page and regenerate it with the correct locale.
