Target version:	
Resolution:	
Description I feel that the "Fixed version" select box that appears for issues after having created a version is nonsensical, especially for a user filling out a new issue. <ul style="list-style-type: none">• Past tense is just wrong (in any language?)• The person filling out the issue will likely have no idea what version the problem will be addressed in.• I'm guessing that for most software development, the "Fixed version" will not ever be set when the issue is closed.

Revision 1206 - 2008-03-08 10:06 - Jean-Philippe Lang

Changes 'Fixed version' label to 'Target version' (closes #723, #808).

History

changes proposed in [#724](#) would override this

#2 - 2008-02-27 09:27 - Nikolay Solakov

I think "Fixed" here is more like something that is "fixated" in the future. Adjective. Not the past tense of the verb "Fix". However there is really some misunderstanding. Maybe better is "Target".

JP, what do you think, am I right?
