Description
Since Redmine now require i18n-0.4.2, i18n itself require >=rails-2.3.10, and rails require >=rack-1.2.1. Please update [RedmineInstall](#) if it is correct.

History

#1 - 2011-01-12 09:34 - Jean-Baptiste Barth

It isn't, i18n doesn't require rails at all from what I've seen. Plus rails 2.3.10 isn't supported for the moment (weird bugs in redmine due to active record incompatibilities).. Can you confirm (or paste the error you see with i18n install) before we close ?

#2 - 2011-01-12 10:02 - Azamat Hackimov

I get this output:

script/server -e production

Did you make any change to your active_support gem?
We have gem 'i18n', '>= 0.1.3' in 2.3.5 (not ~>) which should not raise this error.

#4 - 2015-04-05 07:02 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

Bundler have been used to manage gems since Redmine 1.4, no need to install i18n manually any longer.
We can close this issue.
