Target version:	0.8		
Resolution:	Fixed		
Description Currently, in order to add a note (comment) to a ticket, it is necessary to "Update the ticket". While I think its fine that its possible to add a note while updating the ticket, I also think it would be better if the user was also able to click a "reply" button on each existing note and edit the new note directly underneath. This has the following benefits: <ul style="list-style-type: none">• Minimizes scrolling• Keeps the edit box focused to the job at hand• Would enable thread / targeted reply support

Associated revisions

Revision 1480 - 2008-05-30 19:42 - Jean-Philippe Lang

Adds a Reply link to each issue note (#739). Reply is pre-filled with the quoted note.

History

#1 - 2008-02-25 16:19 - chris mcharg

oops... subject should be: reply button/link after each **existing** note

#2 - 2008-05-30 19:40 - Jean-Philippe Lang

- Subject changed from issues: reply button/link after each exiting note to reply link after each existing ticket note
- Category changed from UI to Issues
- Status changed from New to Closed
- Target version set to 0.8
- Resolution set to Fixed

Done in [r1480](#).
