

Redmine - Defect #7537

Authen::Simple::LDAP bug affects Redmine.pm authentication

2011-02-04 00:42 - Bryce Nordgren

Status:	Closed	Start date:	2011-02-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.3
Resolution:	Fixed		

Description

Subversion commits were down for about a week while I tracked down a problem whereby authentication via the Apache module was failing. I could still login to Redmine the web app, but could not perform any subversion operation which required authentication. I am actually using RedmineAdvanced.pm (#3712), but the problem affects both Redmine.pm and RedmineAdvanced.pm.

Details, including both a fix and a workaround, here: <https://rt.cpan.org/Public/Bug/Display.html?id=65426>

Whenever the bug is closed out on CPAN, this ticket can be closed out too. I'm only filing here because it raises the visibility of the problem somewhat, and may help lead someone to a solution quickly.

History

#1 - 2011-03-24 06:32 - Toshi MARUYAMA

- Category changed from *SCM* to *SCM extra*

#2 - 2018-09-15 08:24 - Go MAEDA

- Status changed from *New* to *Closed*

- Resolution set to *Fixed*

It seems that the bug was fixed in Authen-Simple-LDAP 0.3 released on 2012-04-19.
