Redmine - Defect #7582

hiding form pages from search engines

2011-02-09 08:20 - Yuki Sonoda

Status: Closed Start date: 2011-02-09

Priority: Normal Due date:

Assignee: Jean-Baptiste Barth % Done: 0%

Category: Search engine Estimated time: 0.00 hour

Target version: 1.2.0

Resolution: Fixed Affected version: 1.1.1

Description

Form pages like /issues/new are not worth to be indexed by search engines. And moreover it is sometimes confusing for visitors from search engine. When you have a question about redmine and you search about it, what can you do if /issues/new appears?

It happens when these form pages are opened for anonymous user. It actually happened at redmine.ruby-lang.org once. So I wrote the attached patch. This patch adds a meta element as follows in some pages:

<meta name="ROBOTS" content="NOINDEX,FOLLOW,NOARCHIVE" />

Related issues:

Related to Redmine - Defect #6734: robots.txt: disallow crawling issues list ... Closed 2010-10-24

Associated revisions

Revision 5443 - 2011-04-12 21:22 - Jean-Philippe Lang

Adds noindex, noarchive robots meta tag on form pages (#7582).

History

#1 - 2011-02-12 15:25 - Jean-Baptiste Barth

- Status changed from New to 7
- Assignee set to Jean-Baptiste Barth
- Affected version (unused) set to 1.1.1
- Affected version set to 1.1.1

Makes sense to me. I saw some people use it uppercase, other lowercase. Do you know if there is any difference? (I don't care about standards here, but some exotic search engines may have bots with exotic implementations..)

#2 - 2011-03-13 17:18 - Jean-Philippe Lang

- Target version set to 1.2.0

#3 - 2011-03-16 22:26 - Be Fio

Related to #6734 (check note-9). Issue #6734 could be solved with this issue as well, since the code required is basically what's needed.

#4 - 2011-04-12 21:23 - Jean-Philippe Lang

- Status changed from 7 to Closed
- Resolution set to Fixed

Patch committed in <u>r5443</u>. It was lowercase'd for consistency with other head tags.
