<b>Description</b> I guess it is usefull to make it possible that one kann define keywords like "fixes" but distinguish between the trackers in which state the issue of the tracker should be set  if <a href="#">#123</a> belongs to tracker "Feature" then "fixes <a href="#">#123</a> " means feature goes to "Ready for test"  if <a href="#">#123</a> belongs to tracker "Build" then "fixes <a href="#">#123</a> " means feature goes to "Done"  assuming that Support doesn't have the state "Ready for test" but has the state "Done"  Additionally the issue <a href="#">#1232</a> has other good ideas which should be done in one thing with my "tracker wise" idea  regards Matthias

This should be fixed in [r12216](#).

#### #6 - 2013-10-13 12:31 - Ivan Cenov

Yes, it works in [source/trunk@12218](#).

#### #7 - 2013-10-13 14:39 - Jean-Philippe Lang

Thanks for your feedback Ivan.
