

Redmine - Defect #7593

Git: Associated revisions in issue view doesn't use the Referencing keywords

2011-02-09 18:09 - Matthias Neubert

Status:	Closed	Start date:	2011-02-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.0
Resolution:	Invalid		
Description			
Hello,			
in Redmine 1.10 and 1.11 I found that using GIT as SCM the linking of commits and the Issue using " keyword #123 " only works for keyword refs (eg. ref #234) , but not for others, e.g. IssueID or any self defined keywords. Only when writing refs # 123 in "Associated revisions" in the issue #123 the commit is listed.			
Is it a question of a redmine setting or is it a real bug?			

History

#1 - 2011-02-16 12:46 - Matthias Neubert

I guess it is a bug. Can someone confirm that this is the case (at least using a git repository)

btw. : I forgot to set category SCM and now I cannot change anymore

#2 - 2011-02-16 12:55 - Toshi MARUYAMA

- Category set to SCM

#3 - 2011-02-16 12:58 - Toshi MARUYAMA

- Subject changed from Associated revisions in issue view doesn't use the Referencing keywords to Git: Associated revisions in issue view doesn't use the Referencing keywords

Git has 7 days problem [#7146](#).

#4 - 2011-02-17 12:52 - Matthias Neubert

Its not the 7 days Problem. Also we don't have problems getting references to commits in not-master branches.

As long as we use "refs" in commit message everything works fine.

But "IssueID" an every other keyword does not work.

btw: when in repository view the #12345 is linked correctly to the issue 12345 in the commit messages.

The problem is the way back: listing commits in issue view by using other keywords than refs or even none (which would be best for me) using the special Keyword IssueID.

Used components:

Git 1.7.3.1

Redmine 1.1.0

MySQL

#5 - 2011-02-17 15:53 - Toshi MARUYAMA

- File *setting.png* added

- File *hg-repo.png* added

- File *issue.png* added

It works fine on my Mercurial test repository.

#6 - 2011-02-18 00:14 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid

You can use `**` in setting.

For example.

<https://www.chiliproject.org/issues/170>

#7 - 2011-02-18 11:10 - Matthias Neubert

Hello,

is it possible that changing the reference keyword (e.g. to `*`, which I already tried)

only affects new commits, which happen after setting the keyword to `*` ?

Is there a rake command to run refresh all these tickets to use the new `*` as reference key?

regards

Matthias

#8 - 2011-02-18 11:44 - Toshi MARUYAMA

No.

There is feature issue #1273.

#9 - 2011-02-18 17:04 - Matthias Neubert

I ll try this as an workarround:

"I had to delete the repository from the project and re-add it to get the associations updated."

#10 - 2011-02-18 17:08 - Matthias Neubert

Works!
