Target version:	
Resolution: Duplicate	
Description All a custom field to choose a user from the system. Either multi select (when you get there) or single user selection. For example could add a custom field for 'impacts users' and then select the users that this issue impacts.	
Related issues: Is duplicate of Redmine - Feature #2096: Custom fields referencing system tab... Closed 2008-10-27

+1

We would also like this feature. We need to assign an IT Change Manager to the Issue (and keep Assigned To for the developer). We would also like Redmine to send Status Updates of the issue to the User in the Custom field.
