

Redmine - Feature #7725

REST API for files

2011-02-25 21:56 - Alex Last

Status:	Closed	Start date:	2011-02-25
Priority:	Normal	Due date:

Category:	REST API	Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		

Description

would be nice to have the API to manipulate files remotely.
e.g. to upload new distributives using some automated scripts.

Well for starters even a simple *files* list would do for me..
right now the only way (i know of) is to filter *activity*..

May i ask the maintainer/some official to get some word out on the files-API topic?

Reading through all/most threads regarding this topics, i still have no real clue if:

1. such a feature is planned (or at least considered) at all
2. if so, if there's a roadmap or something?

thx,
Jan

Lately, some progress is made on the REST API features like the file attachments - see [#8171](#). However, as far as I can see from the current documentation, it's still not possible to manage a project's 'Files' and 'Documents' using the REST API.

I would also like to see this feature for automated uploading of files; e.g. test builds after automated building in a post-receive/post-commit hook.

#3 - 2012-03-18 21:18 - Gert van Dijk

In the meantime I created a Python script to overcome this. See [redmine-file-uploader on GitHub](#).

I can now upload my builds from the build server to Redmine in the 'Files' section of the project for internal testing/deployment.
For anyone also in need of this; hope this helps.

#4 - 2013-05-12 17:04 - Bengt Lüers

The linked script works fine for uploading, but I would like to download files to mirror them in a Git repository. Is there any chance that this will make it into the API, soon or do I have to write something that does the downloading in the same fashion?

#5 - 2013-06-27 11:24 - Dmitry Popov

Thanks, Gert! Your script works like a charm!

But still, API support would be appreciated.

#6 - 2013-06-27 15:49 - Dmitry Popov

I've rewritten the script in Ruby:

```
require 'mechanize'

# Replaces \ with / and removes "
ARGV.map!{|a|a.gsub('\','/')}.gsub(/^(.+)"$/,'\1')}

filename = ARGV[0] || abort('Filename must be specified')
puts "File:      #{filename}"
url       = ARGV[1] || abort('Redmine URL must be specified')
puts "Redmine URL:  #{url}"
username  = ARGV[2] || abort('Redmine username must be specified')
puts "Username:    #{username}"
password  = ARGV[3] || abort('Redmine password must be specified')
puts "Password:     #{'*' * password.length}"
project   = ARGV[4] || abort('Redmine project must be specified')
puts "Project:      #{project}"

login_page_path = '/login'
files_page_path = '/projects/' + project + '/files'

agent = Mechanize.new

# No certificate verification (I had to use this hack because our server is bound to custom port)
# agent.agent.http.verify_mode = OpenSSL::SSL::VERIFY_NONE

agent.get(URI.join(url, login_page_path)) do |login_page|
  login_page.form_with(:action => login_page_path) do |login_form|
    login_form.username = username
    login_form.password = password
    end.submit
end

agent.get(URI.join(url, files_page_path + '/new')) do |upload_page|
  upload_page.form_with(:action => files_page_path) do |upload_form|
    upload_form.file_uploads.first.file_name = filename
    end.submit
end
```

Here's the script to delete uploaded files:

```
agent.get(URI.join(url, files_page_path)) do |files_page|
  file_link = files_page.link_with(:text => File.basename(filename))
  if file_link
    file_id = file_link.href.match(/download\/(\d+)/)[1].to_i
    agent.post(URI.join(url, "/attachments/#{file_id}"), {'_method' => 'delete', 'authenticity_token' =>
files_page.at('meta[@name="csrf-token"]')[ :content]})
  end
end
```

#7 - 2015-02-11 17:41 - Lucile Quirion

I also need a REST API for uploading files and noted that there is several open tickets concerning that feature ([#18245](#), [#13800](#))

So I've started working on it.

I'll try to include the patch submitted in [#13800](#)

#8 - 2015-03-12 07:35 - Toshi MARUYAMA

- Related to Feature [#18245](#): Documents REST API added

#9 - 2015-03-12 07:36 - Toshi MARUYAMA

- Related to Feature [#13800](#): File REST API added

#10 - 2015-03-18 08:57 - Toshi MARUYAMA

- Related to Patch [#19116](#): Files REST API added

#11 - 2015-07-25 06:26 - Mischa The Evil

- Has duplicate Feature [#20404](#): REST API support for project files (attachments) added

#12 - 2017-01-09 13:45 - Go MAEDA

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

Implemented by [#19116](#), will be available in upcoming 3.4.0.
