

Redmine - Defect #7739

Redmine 1.1.0 german translation of `[[Subject]]` doesn't work

2011-02-28 12:41 - Matthias Neubert

Status:	Closed	Start date:	2011-02-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	I18n	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
<b>Description</b> Hello,  e.g. in Issues List the Subject column is showing <a href="#">Subject</a> instead of its translation. Problem doesn't occur when user has english as language, but at least in german it just shows <a href="#">Subject</a> On redmine.org the problem currently doesn't occur. We use gem i18n 0.4.2, whats used by redmine.org?  regards Matthias			

History

#1 - 2011-02-28 12:42 - Matthias Neubert

damn, I noticed that using `[[...` makes a wiki syntax. so my redmine shows me

`[[Subject]]`

#2 - 2011-02-28 13:06 - Matthias Neubert

I just notified that this issue might be related to the plugins we use (backlogs and advanced roadmap). I will find out and then report here.

#3 - 2011-02-28 16:06 - Matthias Neubert

OK, its redmine\_backlogs Plugin whose installation causes the defect. Sorry for bothering you

#4 - 2011-02-28 16:08 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

No problem !
