Description

Adding an option to disable the mail send out to new users that is picked up by the mail_handler would be a really nice feature

File: app/models/mail_handler.rb

```
when 'create'
  @user = MailHandler.create_user_from_email(email)
  if @user
    logger.info "MailHandler: [#{@user.login}] account created" if logger && logger.info
  #   Mailer.deliver_account_information(@user, @user.password)
  else
```

Quick solution is just to comment out line 67 (fix kindly provided by [Jason B](#)) but an option would be really nice :)

This has long been implemented (via #11498 for version#60) as the --no-account-notice option. Closing this issue as such, in favour of #11498.
